ABOUT ESET

WHAT IS ZERO TRUST?

ESET AND ZERO TRUST

YOUR ACTION PLAN

ESET as an Organization

30+ years in Cybersecurity

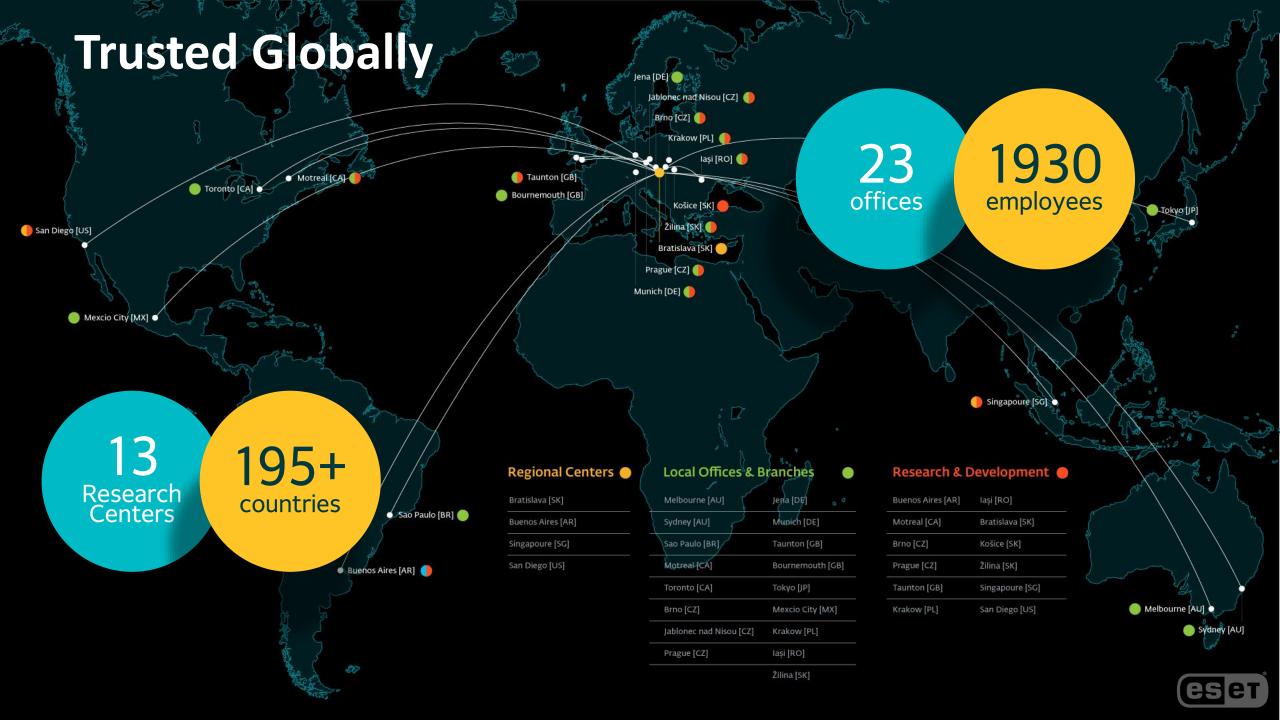

We're Global largest Cybersecurity company in the EU

Privately held,financially
independent

Consistent Award-Winning Technology

What is Zero Trust?

Zero Trust (ZT)

Ground Zero – ZT Day

Core Principles of Zero Trust

Principle 1

All networks are untrusted

Principle 2

Least privilege must be enforced

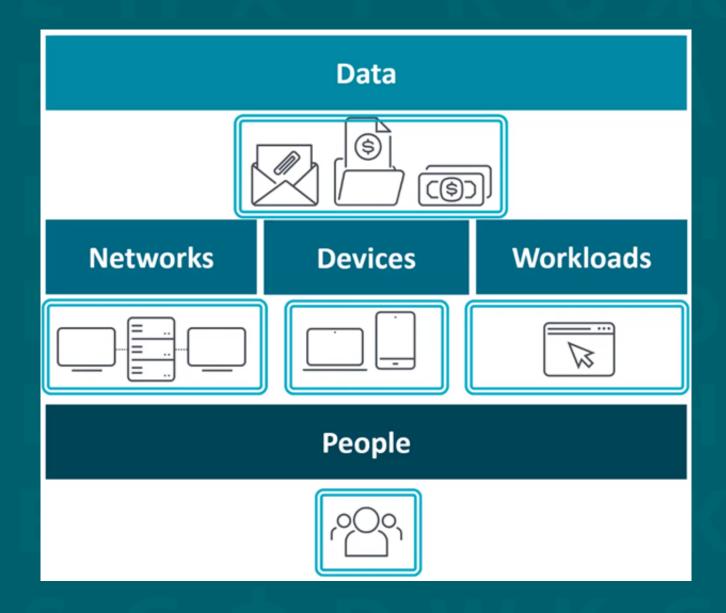

Principle 3

Assume breach

Zero Trust Framework

You don't need to start from scratch

People

- JML / RBAC Design
- Access re-certification
- Two-factor authentication
- Risk based authentication
- Privileged User Identity Management
- Biometric based authentication
- Account segregation
- Identity Verification
- Browser Isolation Technology

Workload

- Cloud workload security
- Container security configuration
- VM security configuration
- Runtime container security
- Web application firewalls
- Cloud Security Gateway
- Connectivity inventory
- Workload asset management

Devices

- Device asset management
- Endpoint security suites (ESS)
- · Device posture checking
- Endpoint Detection and Response (EDR)
- · Mobile security suite

Networks

- · Network asset visibility
- Network transmissions protocol security
- Network device configuration management
- Network segmentation (virtual / physical)
- Micro segmentation (software based)
- Vulnerability management
- Network security policy management

Data

- Data encryption (at rest & in transit)
- Data classification
- Data asset classification and sensitivity analysis
- Data leakage prevention (DLP)
- File integrity monitoring (FIM)

Security Orchestration and Automation

Security Analytics

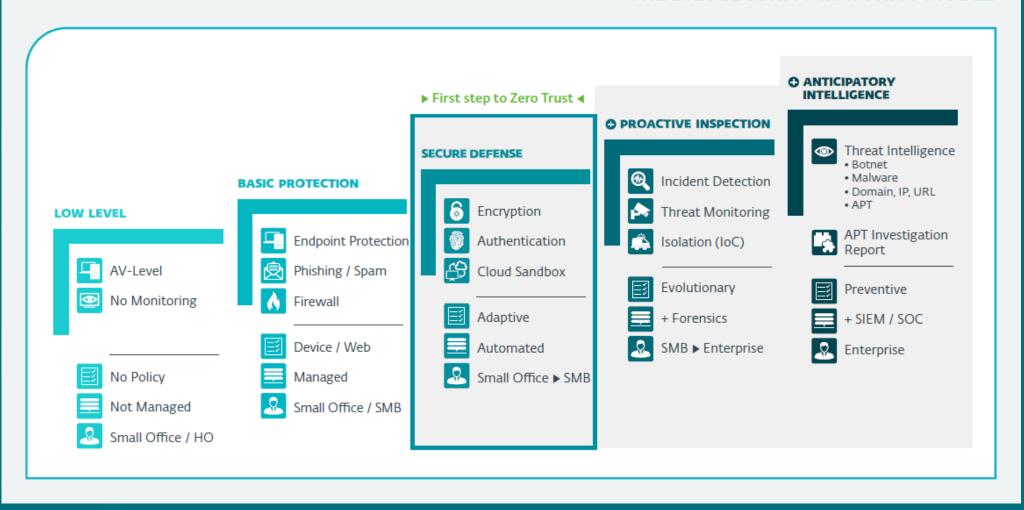

ESET and Zero Trust

The ESET Zero Trust maturity model

THE ESET SECURITY MATURITY MODEL

Level 1: Secure Defence

Multi-secured endpoints are the foundation for Zero Trust Security

- **Endpoint Security:** ESET Endpoint Security is our award-winning endpoint security solution that protects all endpoints and servers across operating systems using multilayered technology
- Access Management: ESET Secure Authentication provides secure access management with multi-factor authentication to ensure that all access to company systems and networks are secure.
- Data Security: ESET Full Disk & Endpoint Encryption supports an organization in data security with certified encryption to ensure that an organization's data does not fall into the wrong hands
- Cloud-Sandboxing: ESET LiveGuard Advanced ensures that an organization keeps its network free from all kinds of threats with the help of cloud sandboxing.

Level 2: Proactive Inspection

Detect anomalies in real time and maintain control over your own perimeter

Endpoint + EDR = Endpoint Protection & Response (EPR)

ESET's Endpoint Solutions
Every single layer of our
endpoint solution delivers
data to ESET Enterprise
Inspector.

A comprehensive EPR solution
to defend against threats
to your network,
including prevention,
detection and remediation
measures.

Sophisticated EDR tool that lets you analyze large

ESET Inspect

amounts of data in real time to detect any threat early.

Level 3: Anticipatory Intelligence

Preventive protection through a "picture perfect" situation

Early warning system

Monitors your assets in cyberspace with the help of one of the best data bases in the world.

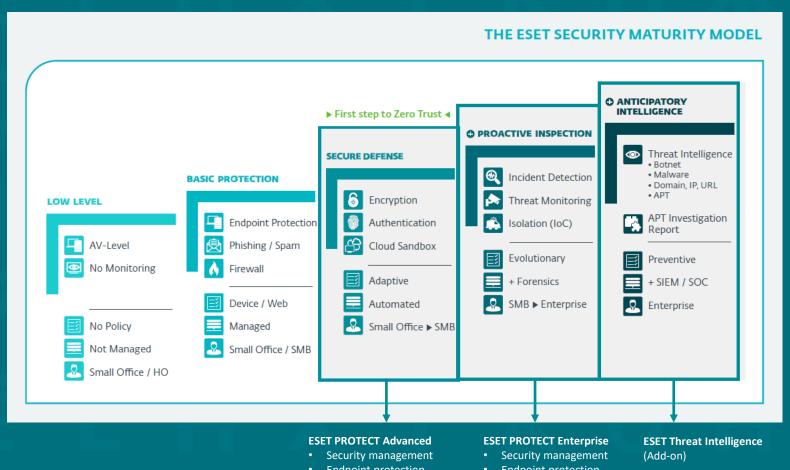

delivers global data
secured sources in
Real-time, protects your online
presence,
Certificates and apps and
so ultimately your reputation

Datafeeds

110 million sensors, honey pots, DarkWeb and social media data and our own teams of experts ensure quality.

ESET Zero Trust recommended solutions

- Endpoint protection
- File server protection
- Full Disk Encryption
- Cloud sandbox

• ESET Secure Authentication (Add-on)

- Endpoint protection
- File server protection
- Full Disk Encryption
- Cloud sandbox
- Endpoint Detection and Response

Action Plan

- Executive buy-in
- Critical asset identification
- Identity management and governance
- Multi-factor authentication
- SOC strategy and maturity assessment

Here today. Here tomorrow. Here for you.
