ABOUT DIGITAL SERVICES LAB

Our speciality is non-profits and for-purpose business.

We are not only creative, but we are also a strategically minded digital services agency specialising in the charity and non-profit sector. We provide non-profits and ethical businesses a partnership to extract, reach and exceed their online goals.

- Among the services we offer are:
- Digital Strategy Workshops
- Web Design and Development
- Search Engine Optimisation
- Website Care Plans & Website Hosting
- Graphic Design

We **LOVE** working with people who **LOVE** doing good!

ABOUT THE DIRECTORS

**DIGITAL
SERVICES
LAB**

BEL TEMBY

Bel lives on the beautiful country of the Bidawal people in Mallacoota. Her background in information technology, social services and law led her to create Digital Services Lab. Her substantial experience working on Boards and leading non-profit organisations showed the need for a business like this.

Bel's studies include, Social Science, Business Management, Marketing and User Experience Design.

In 2010, Bel designed a bespoke career planning software solution for Victorian Secondary Schools used by over 100,000 students.

Today Bel is recognized as a web of information (pun intended!) for the non-profit sector, demonstrated by invitations from online platforms like Connecting up to present to a community with over 35,000 members.

Some of the topics Bel has presented are "The Website Health Check", "Copywriting for your Website", and "How to be Found Online".

Bel also delivers her bespoke Digital Strategy Workshop "Strategiser." She loves working with the sector and enjoys meeting new non-profits across Australia.

Before founding Digital Services Lab, Mike spent 12 years in the corporate sector working as an IT Business Analyst and Functional Analyst for Asahi.

Working with large scale Tier 1 Enterprise Resource Planning (ERP) systems and many other bespoke software solutions, Mike developed specialist skills. These include requirements gathering, solution design and delivery, project management, testing and incident management, among others.

Mike is continually up-skilling and staying up to date with the latest trends. He has also studied business analysis, front end web development, and WordPress development

With a desire to escape the corporate world and be involved in something personally rewarding, Mike and partner Bel combined their skills and experience to start Digital Services Lab.

Today you will find Mike designing and developing plugins for WordPress and delivering bespoke solutions for our non-profit clients. His work in this space is of the highest standard. We are fortunate to have his wealth of experience on our projects.
